

Cross Border Livestock Health Conference

Improving Emergency Management across our Borders

Dr. John Clifford
U.S. Department of Agriculture
Animal and Plant Health Inspection Service
Veterinary Services
July 17, 2016

HPAI Planning: Biosecurity

- Biosecurity applies to all aspects of production
- APHIS is seeking industry input on better ways to monitor biosecurity

HPAI Planning: Indemnity

Changes to processes:

- Split payments for contract growers
- Biosecurity self-certification
- Biosecurity plan
- Inventory upon suspicion of HPAI

A close-up photograph of a computer screen displaying a spreadsheet. The spreadsheet contains several rows of numerical data, including 100,000, 10,000, 10,000, 75,000, and \$205,000. The text is slightly blurred, suggesting a shallow depth of field. The background is a light blue color, and the overall image has a soft, slightly out-of-focus appearance.

100,000
10,000
10,000
75,000
\$205,000
-200,000

HPAI Planning: Depopulation

- Goal: Depopulate infected flocks ideally within 24 hours

HPAI Planning: Virus Elimination Payments

- Flat rate for each poultry type
- Based on cost for dry cleaning and heating to eliminate virus
- Producer can choose method
- Paid in two installments

FAD Zoning Background

- The first action item: bilateral arrangement for mutual recognition of zoning decisions in the event of an FAD outbreak
- Establishes processes for maintaining the arrangement over time
- Outlines a strategy for engaging stakeholders in developing critical resources and strategies for implementation

FAD Zoning Arrangement

- Initiative largely supported by U.S. and Canadian industry groups
- Strong interest in continued stakeholder engagement
- Two U.S. groups opposed to initiative as a regulatory model
- Industry-specific questions and/or suggestions for improvement

Temporary EM-related Livestock Movement Permits

- The U.S.-Canada RCC created a bilateral SOP for emergency international transits of livestock
- Will allow to quickly establish procedures when required
