

Kate Miller LEED AP

Kate has led project teams with effective partnerships at their core. Defining mutually desired outcomes she has worked to create win /win strategies. As Project Manager of the Energy Edge Project at Bonneville Power Administration the Team she created an industry accepted first new commercial buildings program.

The collaborative model is her forte. She believes in leveraging environmental goals by making them acceptable from a business perspective. Using innovation and technology as adaptation strategies in a changing world businesses are able to grow within parameters.

At Cascade Sierra Solutions she is the Truck Stop Electrification Project Coordinator. With the price of diesel at record high levels, there is a crisis/ opportunity. The Trucking industry is looking for answers and this offers new synergistic territory.

Electrification for commercial fleets offers new benefits to the transportation industry and can be a game changer.
