

Regulatory Cooperation Council Update

Dr. John Clifford
U.S. Department of Agriculture
Animal and Plant Health Inspection Service
Veterinary Services
July 17, 2016

Current Status

- North American Foot-and-Mouth Disease Vaccine Bank
- North American Plan on Animal and Pandemic Influenzas

QUAD Epidemiological Team

- Vehicle by which the two countries collaborate and share information, along with Australia and New Zealand.
- QUADs initiatives:
 - FMD vaccine sharing arrangements
 - Joint collaboration for favorable trade language in the OIE code
- The International Animal Health Emergency Response Corps
- The 3-D QUADs team
- The modelling team

Risk Mitigation & Vaccination Strategies

- Canada requires all returning swine-haulers wash, disinfect, and heat-treat trucks before crossing the border back into Canada
- This ensures that porcine epidemic diarrhea virus does not cross the U.S.-Canadian border
