Founded in Bellingham, WA in 1949; now a top 10 Global Terminal Operator (GTO)

Largest marine/rail terminal operator in U.S. and Western Hemisphere

220 operations in 12 countries with over 13,000 employees

Award-winning leader in environmental practices

High-wage union employer

Pacific Container Terminal
Long Beach

Manzanillo, Mexico

SSA-Atlantic Operations at GPA in Savannah

PRS Rail Ramp
Value-Added Logistics & Supply Chain Services

- Marine Terminal Operations
- Stevedoring
- Rail Yard Operations
- Project Management
- Equipment Procurement
- Arrange Financing
- Information Systems Design & Installation
- Trucking & Warehousing
- Marketing Support
- Personnel Training
- Port Security
World’s largest privately-held terminal operator
- 13.0 million marine TEUs in 2014
  - 3.7 million TEUs at 7 U.S. terminals
  - 4.5 million TEUs at 6 international terminals
  - 4.8 million TEUs thru port-operated terminals
- 9.3 million TEUs in rail operations

Operations in 9 foreign countries since:
- New Zealand 1993
- South Africa 1993
- Mexico 1995
- Panama 1995
- Chile 2000
- Costa Rica 2000
- Canada 2005
- Vietnam 2006
- Colombia 2007
GPT Overview
Transportation is 75% of product cost

Most efficient modes: rail and large vessels

Capesize vessels are most cost and carbon-efficient—can save U.S. exporters 50% of vessel costs

U.S. dry bulk exports are extremely transportation costs sensitive

GPT will support over 40,000 jobs throughout N. Tier

“Every billion dollars worth of exports generates 8,500 US jobs”

- Floyd Gaibler – Director of Trade Policy for US Grains Council
Gateway Pacific Terminal

Key Site Features:

- 7,000 acres zoned heavy industry, GPT has 1,500 acres
- Natural 65 - 80’ Draft – No dredging necessary;
- Rail Service: BNSF at site boundary;
- Construct three (3) berths in 3000’ x 105’ footprint;
- Construct 1250’ x 50’ access trestle.
GATEWAY PACIFIC TERMINAL
AT-A-GLANCE

5,680 TOTAL JOBS
Represents direct & indirect jobs

5,680

CONSTRUCTION
4,430 JOBS
ONGOING
1,250 JOBS

$600-700 MILLION GATEWAY'S INVESTMENT IN CONSTRUCTION

$1.8 BILLION GATEWAY would add to local economy (construction + first 10 years of operations)

CONSTRUCTION WILL GENERATE $92 MILLION STATE & LOCAL TAX REVENUE

ONGOING SITE OPERATIONS WILL GENERATE $11 MILLION STATE & LOCAL TAX REVENUE

GATEWAY PACIFIC TERMINAL*
PROJECT ENDORSED BY

LABOR
BUSINESS
LOCAL COMMUNITY
ELECTED OFFICIALS

ZERO SUBSIDIES
100% funded by PRIVATE INVESTMENT

$140 MILLION ECONOMIC ACTIVITY GENERATED by GATEWAY PACIFIC TERMINAL annually in NW WASHINGTON

$1.4 Potential TAX MILLION SAVINGS for TAXPAYERS in FERNDALE SCHOOL DISTRICT

$809,000 POTENTIAL TAX SAVINGS for TAXPAYERS in BLAINE SCHOOL DISTRICT

75% of the 1,500 ACRE SITE to remain NATURAL BUFFER

GATEWAY PACIFIC TERMINAL 360.738.7229 info@gatewaypacificterminal.com www.gatewaypacificterminal.com

Gateway Pacific Terminal (GPT) is proposed by SSA Marine. Now based in Seattle, SSA Marine was founded in Whatcom County as Bellingham Stevedoring Company and has been a part of the community for decades.

NEPA vs. SEPA EIS Scope
Federal vs. State EIS Scopes

**NEPA EIS Scope:**

- NEPA scope for the EIS analysis is confined primarily to the project site
- Corp statement on scope:

> “When considered in accordance with the laws and regulations discussed above, many of the activities of concern to the public, such as rail traffic, coal mining, shipping coal outside of U.S. territory, and the ultimate burning of coal overseas, are outside NEPA and the Corps' control and responsibility for the permit applications related to the proposed project”.

**SEPA Expanded EIS Scope:**

- Indirect rail impacts from mine to terminal
- Vessel traffic beyond Washington State waters
- GHG emissions from mine to plant, including end-use of exported product overseas

**Conclusion & Result:** WA state’s unprecedented EIS scope led to USACE to split from the Co-Lead arrangement
Support from Montana & North Dakota

Montana AG Tim Fox

North Dakota AG Wayne Stenehjem

Attorney General Fox (MT) and Wayne Stenehjem (ND) have urged regulators in Washington state to avoid overreach when evaluating the Cherry Point and Longview terminal proposals as doing so:

- Burdens or prevents interstate commerce in violation of the commerce clause of the U.S. Constitution
- Is preempted by Congress’ exclusive prerogative to regulate in the area of extraterritorial regulation of air pollutants.
- Unconstitutionally usurps the prerogatives of the federal government with respect to international commerce and foreign policy.
- Is outside the scope of the Washington state’s authority under the U.S. Constitution and Washington law.
- Is unrealistically broad
- Includes speculative and indirect impacts.
- Requires impossible assessments of foreign environmental impacts.
- Appears to have been designed to hinder development of any coal export terminals.
Importance of Rail to WA State
Rail’s Impact in WA State

● WA state’s freight railroads are a vital mode of transportation that supports Washington’s freight intensive industries, such as manufacturing, construction, agriculture, forest products, and wholesale and retail trade.

● These industries employ more than 1.2 million people, or 40 percent of the WA state’s total employment.

● In terms of contribution to the Gross Domestic Product (GDP), freight intensive industries provided about 42 percent of the state’s total GDP in 2012, or about $106 billion.

Canadian Developments
Expansions of Coal Export Capacity

**FACTS:**

- Four existing terminals in B.C. have announced expansions, representing approximately 30 million mt/yr of new capacity;

- On August 8, 2014 Cloud Peak Energy announced it paid $37 million for the capacity rights to an additional 2 million mt/yr of export capacity at Westshore;

  “Despite current low international benchmark thermal prices we wanted to take this rare opportunity to increase our terminal capacity so we can grow our exports to South Korea, Japan, Taiwan” – CEO Cloud Peak Energy

- On August 21, 2014 Port Metro Vancouver announced permit approval for a 4 million mt/yr coal transfer facility on the Fraser River.

  “Through our comprehensive project review process, stakeholder consultation, as well as third-party validated environmental and health studies, it was determined there are no unacceptable risks and the project could be permitted.” – Port Metro Vancouver
Asian Demand
Asian Demand

- 2013 total demand in Asia for coal was approximately 5 billion mt/yr;
- Asia's coal imports projected to increase from 814 million mt/yr in 2011 to 1,356 million tons in 2040;
- China's seaborne coal imports double in the projection, from approximately 200 million mt/yr in 2011 to 400 million tons in 2040;
- India, like China, has been increasing its coal imports in recent years. In the 2013 “Reference Case”, India's coal imports increase from 140 million mt/yr in 2011 to more than 300 million mt/yr in 2040.

Public and Labor Support
COAL EXPORTS

Overall support and opposition for transporting coal through the Pacific Northwest and exporting it to other countries from ports has remained steady for the past three years.

2012: 55% support, 27% opposition
2013: 41% support, 36% opposition
2014: 47% support, 34% opposition

A new DHM Research survey of Northwest residents finds that support for coal exports through the Northwest is up from where it was last year, when the issue was the subject of public debate and news coverage.
